Wenbin He

Ph.D. Student, Hunan University | Visiting Ph.D. Student, Singapore Management University

wbhe00[at]gmail.com · Homepage · Google Scholar · ORCID

Research Interests

Visual reasoning, Thinking with Images, and reinforcement learning. I am interested in how vision-language models learn to use visual tools to gather evidence during reasoning.

Education & Research Visit

Singapore Management University | Nov. 2026 - Present
Visiting Ph.D. Student, School of Computing and Information Systems
Host supervisor: Lizi Liao · Funded by the China Scholarship Council (CSC)

Hunan University | Sep. 2025 - Present
Ph.D. in Electronic Information · Advisor: Da Cao

Minzu University of China | Sep. 2022 - Jun. 2025
Master of Software Engineering · Advisor: Yu Weng

University of South China | Sep. 2018 - Jun. 2022
Bachelor of Software Engineering

Selected Publications

Cross-Lingual Adaptation for Vision-Language Model via Multimodal Semantic Distillation
Yu Weng*, **Wenbin He***, Jun Dong, Chaomurilige, Xuan Liu, Zheng Liu
IEEE Transactions on Multimedia, 2025 · CCF-A

Enhancing Human-Computer Interaction Through Decoupling Motion and Camera Control in Human-Centric Video Generation
Guanfu Chen*, Xiao Liang*, **Wenbin He***
International Journal of Human-Computer Interaction, 2025 · CCF-B

* Equal contribution.

Research Experience

Hunan University · Doctoral Research | 2025 - Present
I study visual reasoning in vision-language models, with an emphasis on learning to use visual tools to inspect task-relevant image regions.

Aerospace Information Research Institute, Chinese Academy of Sciences | 2024 - 2025
As a research intern, studied architectures for high-resolution vision-language models and implemented data synthesis pipelines for counting, recognition, referring expressions, and visual grounding.

Minzu University of China · Master's Research | 2022 - 2025
Worked on cross-lingual adaptation for vision-language models and visual question answering using knowledge distillation. Also developed methods for text-image person re-identification and controllable human-centric video generation.

Selected Awards

China Scholarship Council Scholarship for doctoral research visit, 2026.

Special Scholarship, Minzu University of China, 2023-2024.
